PROFESSIONAL SUMMARY

Computer Science Engineering student with a strong foundation in programming and core computer science subjects. Hands-on experience through an industry internship and academic projects involving Python development, data processing, and applied AI systems. Familiar with version control, structured problem-solving, and collaborative development environments. Seeking opportunities to grow as a software engineer and contribute to real-world, impact-driven projects.

INTERNSHIP EXPERIENCE

Data Associate L1, *Infotact Solutions* — 12/2025

- Developed Python-based backend logic, automation scripts, and data processing workflows.
- Assisted in building and testing scripts and APIs while following clean coding and version control practices.
- Gained hands-on experience working in a professional development environment with real-world requirements.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, — 2027

BVRIT (B.V. Raju Institute of Technology), Narsapur — Narsapur, India

- Expected graduation

Diploma in Engineering, *Smt. DDGWTTI* — 2024

- CGPA : 9.21

TECHNICAL SKILLS

Programming Languages

- Python
- Java

Databases

- DBMS fundamentals
- basic queries

Core CS

- Data Structures
- Object-Oriented Programming
- Operating Systems
- Computer Networks

Web Technologies

HTML

Tools & Platforms

- GitHub
- VS Code
- Jupyter Notebook
- Google Colab
- Anaconda Navigator

PROJECT

DocuMind Enterprise – RAG Based SOP Assistant

- Designed and implemented a Retrieval-Augmented Generation (RAG) system to answer natural-language queries from internal SOP and policy documents.
- Implemented document ingestion and retrieval pipelines to generate context-aware responses with source references.

DDoS Stage Identification using Random Forest

- Developed a machine learning model using the Random Forest algorithm to classify different stages of DDoS attacks from network traffic data.
- Performed data preprocessing and feature analysis to study attack patterns and support early threat detection.

Intrusion Detection System using Machine Learning

- Developed an ML-based system to classify network traffic as normal or malicious
- Performed preprocessing, feature selection, and trained models (Random Forest / Decision Tree)
- Evaluated performance using accuracy, confusion matrix, and precision-recall

CERTIFICATIONS

- AI Ethics – IBM SkillsBuild (Oct 2025)
- Python Industrial Training – RKJ Technologies Pvt. Ltd. (Jun–Nov 2023)
- Learning Python – Infosys Springboard (July 2025)
- AI Training Program – Corizo (Online)
- Programming Essentials in C++ (CPA) – Cisco Networking Academy (Feb 2025)

EXTRACURRICULAR ACTIVITIES

ILEA Workshop, *Vedic Center* — 07/2025 – 07/2025

- 3-day immersive program on leadership, teamwork, and creative problem-solving.

Member, Marketing Team, *Data Science Visionary Hub (BVRIT Club)*
